

Table 1 of road note 27

Table 1
Suggested Minimum Values of “skid – resistance”
(measured with the portable tester)

Category	Type of site	Minimum “skid – resistance” (surface wet)
A	Difficult sites such as: (i) Roundabouts (ii) Bends with radius less than 150m on unrestricted roads (iii) Gradients, 1 in 20 or steeper, of lengths greater than 100m (iv) Approaches to traffic lights on unrestricted roads	65
B	Motorways, trunk and class 1 roads and heavily trafficked roads in urban areas (carrying more than 2000 vehicles per day)	55
C	All other sites	45

Note: For category A and B sites where speed of traffic is high (in excess of 95 km/h) an additional requirement is a minimum “texture depth” of 0.65mm
